

# Water-neutral aquatic maintenance spray

Harmless to all fish, including marines, corals and invertebrates and environmentally friendly

Moving parts, which are in regular contact with water become difficult to move after some time.

Therefore EHEIM has developed a water neutral spray for use with all makes of aquatic and pond filters and pumps, using a special silicon.

Maintains and lubricates all moving parts for aquarium and pond filters.

You can easily reach even the most inaccessible areas with the practical spray tube – just point and spray!

- rubber sealing rings in pump heads and filter priming systems especially on professional II
- all friction surfaces
- inlet and outlet ball valves and taps
- all plastic moving parts
- also convenient for lubricating moving parts on your aquarium hood and for aquarium cabinet door

Ask your retailer for more details.
