

ParaSalt™

Pond Salt

Controls 80% of All Common Pond Parasites

- Helps Control Common Parasites
- Maintains Healthy Slime Coat
- Safe for All Aquatic Life

20 lb Pail Treats 4,000 Gallons

Net Contents:
20 lbs / 9.07 kg

**Crystal
Clear**®

ParaSalt™ is formulated to increase koi and goldfish electrolytic intake. Electrolytes are critical in building and maintaining a healthy slime coat. Electrolytes such as potassium are essential in wound repair and in times of heavy stress (ie – during water changes or clean-outs). ParaSalt™ is excellent for mucous production when healing from a wound.

ParaSalt™ will also help ward off and remove most common protozoan parasites found in koi and goldfish such as; Dactylogyrus, Byrodctylus, Epistylis, Trichodina and Chilodonella. ParaSalt™ can be used in a salt bath for heavy infestations or as a routine treatment to keep parasites from entering the pond environment.

ParaSalt™ is safe for use with fish, plants, birds or domestic animals that drink from the pond.

Application Rates

8 oz / 226 g	Treats 100 Gallons
16 oz / 453 g	Treats 200 Gallons
24 oz / 680 g	Treats 300 Gallons
32 oz / 907 g	Treats 400 Gallons

POND SIZE CALCULATION: L x W x Avg. Depth x 7.5 = # of Gallons

Routine Application Rate: Apply ParaSalt™ once a month at the prescribed rates above and after a water change, clean-out or during a seasonal change. Most pond fish stress during these times and need the electrolytes to assist in repairing their slime coating.

Persistent Problem Application Rate: For salt baths, add 16 oz of ParaSalt™ for every 5 gallons of water in an isolated bath or quarantine tank. Place infected fish in an aerated (use an air stone) bath for 5-10 minutes or until fish begins to turn over. Remove fish immediately if fish shows any signs of stress. After bath, immediately remove fish to a quarantine tank for 30 minutes and monitor fish closely. After 30 minutes the fish can be placed back into the pond. Make sure to acclimate the fish back into the pond water slowly by floating it in a bag of pond water in the pond so it can regulate its temperature and avoid shock.

For Best Results: Do not over apply ParaSalt™ and follow directions thoroughly for maximum affect. If you are unsure of the bath application please consult your local CrystalClear® pond professional.

Failure to use as directed or changes in water conditions not consistent with label may result in loss or injury to aquatic life. CrystalClear®, Inc. is not responsible for any loss of aquatic life.
