

# ECO-CLEAR

## Pond Filtration Systems

**Pond Filtration has never been easier!**

**We've combined Eco-Clear Pressurized UV Filters and Eco-Clear Submersible Pond Pumps to give you the best in simple, affordable, effective pond filtration!**

- Choose from four systems to filter ponds up to 3900 gallons.
- Dual filtration – filter pads collect solid debris while bio-media provides excellent biological filtration.
- Built-in UV for crystal clear water
- Each complete system includes kink-free tubing and clamps

## WHY IT WORKS SO WELL

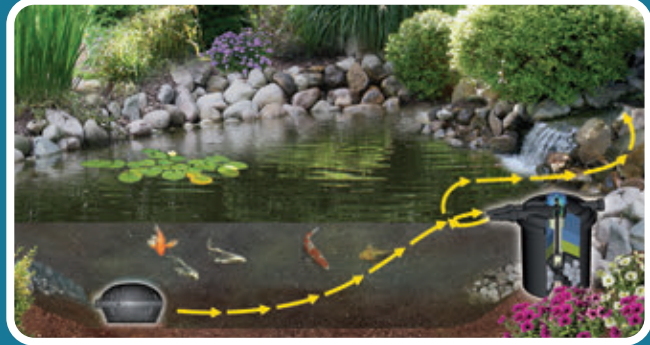

The Eco-Clear Pump sends dirty pond water to the pressurized filter.

The dirty water passes through **multiple densities of foam filters** and is cleaned of solid debris.

Water then passes through **bio-media** for excellent biological filtration.

Filters in these kits have **high-intensity UV lights** that destroy algae cells, eliminating green water.

Cleaned water is returned to your pond.

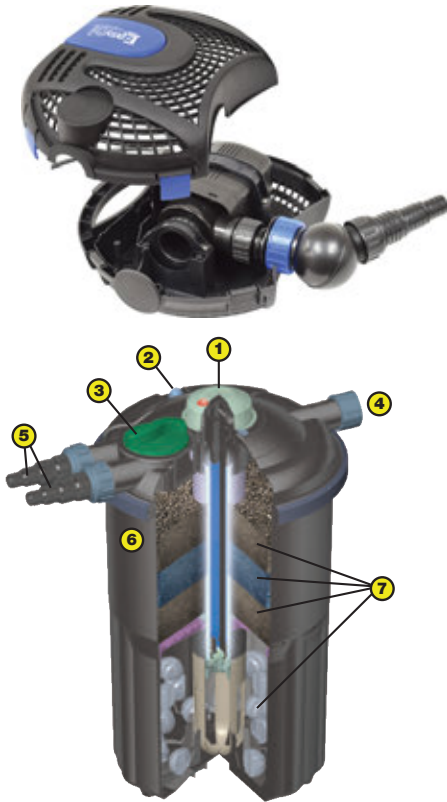

## Eco-Clear Mag Drive Pump Features

- Permanent magnet motor for maximum power, high efficiency and continuous duty
- Epoxy sealed motor - no oil to leak out! Safe for fish.
- Ceramic impeller provides high wear resistance and long life — designed for passing debris up to 3/8" diameter
- Adjustable direction outlet includes 1", 1 1/4" or 1 1/2" step barb fitting

## Eco-Clear Pressurized UV Filter Features

- 1 Built-in UV clarifier for crystal clear water
- 2 Cleaning indicator shows when filter needs to be cleaned\*
- 3 Backwash valve to extend time between full cleanouts\*
- 4 Backwash port\*
- 5 Multi-step connectors – inlet/outlet fittings accept a variety of tubing sizes
- 6 Sturdy filter housings – bury up to cleaning ring for easy concealment
- 7 Dual filtration – filter pads collect solid debris while bio-media provides biological filtration. Filters are easy to disassemble and clean, making maintenance a snap!

\* Cleaning indicator and backwash valve/port are not included on ECK13U systems.
