

biOrb MCR Light Control

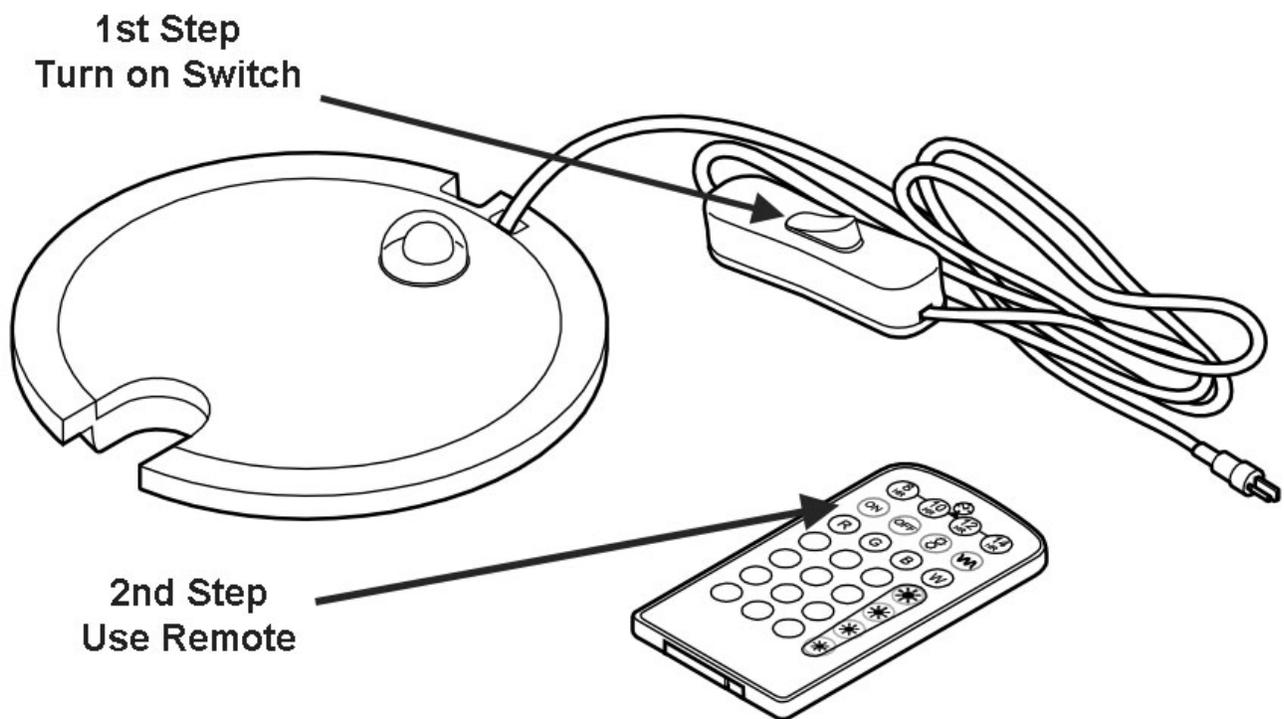

Special Instructions

For proper operation of the MCR Light and Remote

The light will need to be turned on by the switch (1st Step) and then by the remote (2nd Step).

On the box (switch) on the clear cord attached to the product, press down on the minus sign (the light should flicker)

- Make sure the battery is placed properly in the remote (+) sign facing up
- Stand in front of the tank, hold the remote close to the lid and press the on and off button a few times back and forth then select a color.
